NOTIFICATION.

The 4th April 1892.—Surgeon Lieutenant-Colonel A. S. Lethbridge, C.S.I., M.D., whose services have now been placed at the disposal of the Government of India in the Foreign Department, has been employed under the Government of Bengal for a period of nearly fourteen and a half years as Inspector-General of Jails. During this long incumbency he has justly won for himself the reputation of a most able and efficient Head of the Department, and his name will always be associated with the great improvements which, in recent times, have been effected in Jail administration in India. His merits have repeatedly been acknowledged by the Local Government and by the Government of India, and the Lieutenant-Governor cannot allow his transfer to another sphere of duties to take place without recording his sense of the valuable services Dr. Lethbridge has rendered to this Province.

41. The rule passed in notification No. 442, dated the 9th December 1889, is hereby cancelled, and the following rule substituted :—

> *Beali* lands included in a long or five-year lease are not exempted from assessment, but no charge will be made for water supplied to them in the *rabi* season, or for lift irrigation to high lands excluded from assessment, whether in the *kharif* or *rabi* season. No special arrangements to supply water will, however, be made.

> Low lying lands forming part of the rice cultivated area of a village which cannot ordinarily benefit by a canal water, though requiring irrigation in years of drought, will be charged each year at one-third of the usual rate, *i.e.*, eight annas an acre. Lands which, never, under any circumstances, require water will be altogether excluded from the lease.

43. Existing long leases may, with the written consent of the Divisional Canal Officer, be extended for not more than three years without further detailed measurement or enquiry, subject to the provisions of rules 41 and 42 immediately preceding.

NOTE.—When a village is divided by drainage channels into distinct blocks, each block shall be recognized as a separate village for the purpose of these and all other rules under the Irrigation Act.

VI.—The rate chargeable shall be Rs. 2 per acre on the area specified in the application. No actual measurement shall be made for the purpose of assessment.

V.—The Sub-divisional Canal Officer, as a condition of authorizing the issue of a permit under this rule, may require that application for a long lease in the form given in appendix A shall be presented for a lease commencing from the 15th of June of the year next following.

A Dictionary of the Economic Products of India

BY DR. GEO. WATT, C.I.E.

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first five volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the Superintendent of Government Printing, Calcutta.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets; &c. The work is arranged alphabetically

according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Vol. II embraces the letter C in 689 pages; Vol. III contains the letters D, E, F and half of G. Vol. IV latter half of G to middle of L; and Vol. V contains the latter half of L to end of "O." The whole work will, it is expected, be completed in seven volumes during the current year; but an eighth volume may also be issued consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a Glossary of the vernacular and European names of the plants, animals and minerals of India, and as such will be a work of reference, which, it is hoped, may prove of considerable value.

The period of registration of subscribers' names having expired on the 1st October, the price will in future be in India Rs. 45 and in England 3 guineas, payable in advance, for the complete set (exclusive of the Index, for which a separate charge will be made). An extra charge for packing and postage will be made for the set—in India, at 8 annas per volume, and for England, at 2 rupees 6 annas per volume.

For copies bound in half calf or half morocco, Rs. 6 and 8 shillings respectively will be charged extra for the whole sets.

No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately.

IRRIGATION OPERATIONS FOR KHARIF, 1891-92.

No. 444*I*.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Irrigation.

Dated Calcutta, the 5th April 1892.

RESOLUTION.

READ—

Statements Nos. I, II, and III of Irrigation Operations of Canals in Bengal during the kharif season of 1891-92.

OBSERVATIONS.—The area irrigated during the kharif season of 1891-92 was 532,118 acres, against 498,662 acres in 1890-91, showing an increase of 6·7 per cent.

2. The increase took place mainly on the Sone and Saran Canals, being due to the scanty rainfall during the season in the districts commanded by those works.

On the Orissa and Midnapore Canals the rainfall was, on the contrary, more plentiful than last year though unequally distributed through the irrigating season, and the Balasore district showed a decrease of 2,908 acres. In the Cuttack and Midnapore districts the area irrigated was slightly in excess of 1890-91, a result which was mainly due to the scanty rainfall in October.

3. The increase or decrease in the irrigation from each canal is given in the following statement:—

Canals.		Kharif season.		More.	Less.
		1890-91.	1891-92.		
		Acres.	Acres.	Acres.	Acres.

Saran Canal ...	... ...	990	3,645	2,655	.....
	Total ...	498,662	532,118	36,498	3,042

4. On the Midnapore and Saran Canals the only kharif crop irrigated is rice, whilst on the Orissa and Sone Canals there are in addition sugarcane and hot-weather crops.

Order.—Ordered that a copy of this Resolution, and of the statements Nos. I, II, and III, be submitted to the Government of India, Public Works Department, for information.

Ordered also that copies of this Resolution, and of the statements, be forwarded to the Commissioners of the Orissa, Burdwan, and Patna Divisions; the Collectors of Cuttack, Midnapore, Patna, Shahabad, Gaya and Saran; the Superintending Engineers, Orissa, South-Western, and Sone Circles; and the Examiner of Public Works Accounts, Bengal, for information.

TTA, *the 5th April* 1892.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 2ND OF APRIL 1892.

WEATHER conditions at the close of the previous week were a little disturbed, and a few local storms with rain were occurring in North Bengal, though over the remainder of the province weather was generally fine and of ordinary hot weather character. On the 27th, or the first day of the present week, pressure rose slowly over the whole province except over parts of North Bengal, while temperature was falling moderately in all districts, though it was still high and above the normal by from about 3° to 6° or 7°. Humidity was also high, and at almost all stations in the province winds were south-easterly and easterly, and except for one or two showers in North Bengal there was no rain reported on this day. On the morning of the 28th westerly winds had set in over Chota Nagpur and parts of Bihár, and winds generally became much more southerly than on the 27th, apparently showing that a westerly wind current was forcing back the moist easterly current which had been previously blowing, and hence, with this partial interaction of opposing wind currents, conditions became favourable for the production of local storms. Thus on the morning of the 28th almost every station in North and East Bengal and some stations in Bihár and South-West Bengal reported moderate to heavy rain, which generally fell during thunderstorms, or nor'-westers some of which appear to have been exceedingly violent. Pressure on this day also fell exceeding rapidly, the fall at some stations almost equalling a sixth of an inch, and a distinct low-pressure area, where pressure was from a fifth to a quarter of an inch below the normal, formed over Bihár, Central and Western Bengal, and part of Chota Nagpur, again indicating the decidedly disturbed state of the atmosphere. With the existence of this low-pressure area in Central Bengal and Bihár and with the very steep baric gradients which obtained near the head of the Bay, very strong southerly winds set in over Bengal and over the Bay from about Gopalpur northwards, and these continued almost up to the close of the week. The mean temperature on this day also became below the normal at some of the extreme eastern and northern stations, but elsewhere it was still above it by about 3° to 4°. On the 29th pressure continued to fall at the eastern stations and in Assam, though it remained fairly steady elsewhere, showing probably that the area of disturbance was being transferred to Assam. Temperature also fell slowly at many stations, but winds were to a great extent unchanged in direction since the previous day, and very strong winds were reported in connection with the steep baric gradients which still existed. The number of local storms with rain reported in Bengal on the 29th was very small, and they were confined to a few districts in East and North Bengal, but Assam seems to have received heavy rain, for Sibsagar reported nearly four and-a-half inches of rain on this day. On the 30th a rather rapid increase of pressure took place, and the distribution became a little more normal, but still gradients were steep and gave strong southerly winds over the province, while on the 31st a further rapid rise occurred, and pressure became slightly above the normal over parts of South and South-East Bengal, though it was still slightly in defect elsewhere. Again on April 1st pressure rose slowly at all stations except a few in the centre of the province where a distinct tendency to the formation of a low-pressure area existed, though on the 2nd with a further rather rapid increase of pressure this tendency practically disappeared and pressure distribution became fairly normal. Up to the 1st, however, conditions in Bengal generally remained fairly settled, but from the 1st to the 2nd they were again slightly disturbed, and a considerable number of local storms with rain occurred in certain districts of East and North Bengal. Temperature during the last few days of the week had generally fallen slowly, but even up to its close the mean temperature was generally in excess of the normal by amounts ranging up to about 4°. Owing also to the decrease in the steepness of the baric gradients over the province, the strength of the winds diminished rapidly towards the close of the week, and only moderate southerly, and south-easterly winds were reported on the 2nd.

The meteorological conditions during the week have therefore been decidedly important from the fact that rather heavy general rain has fallen over practically the whole of North and East Bengal and light rain over parts of North Bihár, but the falls in other divisions have been unimportant.

Pressure—Has been below the normal during the greater part of the week, and the defect at one time amounted to a distinct depression. The mean pressure for the week has therefore been in defect of the normal in all districts, the defect usually ranging from about 0·03″ in South-East Bengal to considerably more than a tenth of an inch in parts of Bihár and of West Bengal and Chota Nagpur, over which area the area of low pressure existed for some days.

Temperature—Has again been high almost throughout the week, and the mean temperature of the province for the week has been 3·7° in excess of the normal. This excess has been largest in Chota Nagpur, where it has equalled 5·5°, and in South-West Bengal and South Bihár, where it has been 4° and upwards.

The distribution of temperature over the province and its variation from the normal for the week are most clearly seen in the table below, where the average maximum, minimum, and mean temperatures for the period at nine typical stations in different districts are compared with their normal value. During this week the night or minimum temperatures have been more largely in excess of the normal than the day or maximum temperatures; but some

very high maximum temperatures have nevertheless been reported, for Bankura on the 29th March registered 107·6° and Chaibassa 108·1°, while temperatures of from 106° to 107° have been recorded at Cuttack, Raniganj, and Dehri :—

Rainfall.—North Bengal has received an average fall of 1·44 inches of rain during the week and East Bengal one of 0·87 inch. In North Bihár the falls only average 0·20 inch, and in South-West Bengal and North Bihár only 0·06 inch.

The districts which have received the heaviest falls have been Rangpur 2·88 inches, Mymensingh 2·21 inches, and Jalpaiguri 1·75 inches, while falls of one to one and-a-half inches are reported in Rajshahi, Bogra and Dacca, and of half to one inch in Faridpur, Comilla, Malda, Noakhali, Pabna, Dinajpur, Darjeeling, and Purneah.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, d from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the ermometers are verified, and the readings have been corrected to a standard constructed and verified at the ew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet ove the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in e Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taker from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast.

The 15th March 1892.

No. 98.—*Notification.*—In exercise of the powers conferred on him by section 99 of Act III (B.C.) of 1876, notice is hereby given that the Hon'ble the Lieutenant-Governor of Bengal proposes to pass the following rules for the Orissa Canals :—

41. The rule passed in notification No. 442, dated the 9th December 1889, is hereby cancelled, and the following rule substituted :—

Bgali lands included in a long or five-year lease are not exempted from assessment, but no charge will be made for water supplied to them in the *rabi* season, or for lift irrigation to high lands excluded from assessment, whether in the *kharif* or *rabi* season. No special arrangements to supply water will, however, be made.

42. The rule passed in notification No. 330, dated the 15th September 1890, is hereby cancelled, and the following rule substituted :—

Low lying lands forming part of the rice cultivated area of a village which cannot ordinarily benefit by a canal water, though requiring irrigation in years of drought, will be charged each year at one-third of the usual rate, *i.e.*, eight annas an acre. Lands which never, under any circumstances, require water will be altogether excluded from the lease.

43. Existing long leases may, with the written consent of the Divisional Canal Officer, be extended for not more than three years without further detailed measurement or enquiry, subject to the provisions of rules 41 and 42 immediately preceding.

NOTE.—When a village is divided by drainage channels into distinct blocks, each block shall be recognized as a separate village for the purpose of these and all other rules under the Irrigation Act.

44. Applications for leases in the *kharif* season will be received up to the 1st of September. After that date the following conditions will be imposed :—

I.—The application must be for a block of land which can be irrigated without unleased lands necessarily being irrigated.

II.—The application shall state the areas in the occupation of each cultivator, and the water-rates payable, and shall be signed by all the cultivators whose names are mentioned in the application. The signatories shall bind themselves to be jointly liable for the water-rates payable, including those due on lands included in the block, the occupiers of which have not for any reason signed the appication.

III.—The Sub-divisionll Canal Officer, after ascertaining that the area noted in the application reasonably represents that included in the block specified, and that it is possible to supply water within a limited time without irrigating unleased areas, may authorize the issue of a permit for the area specified in the application.

VI.—The rate chargeable shall be Rs. 2 per acre on the area specified in the application. No actual measurement shall be made for the purpose of assessment.

V.—The Sub-divisional Canal Officer, as a condition of authorizing the issue of a permit under this rule, may require that application for a long lease in the form given in appendix A shall be presented for a lease commencing from the 15th of June of the year next following.

VI.—In the case of low lying lands for which water is seldom required, or lands for which a long lease application could not for any reason be accepted, the rate a chargeable will be Rs. 1-8 instead of Rs. 2 per acre as mentioned in clause IV.

HIGH COURT NOTICES.

CIRCULAR ORDER
ISSUED BY AUTHORITY OF THE HIGH COURT OF JUDICATURE AT FORT WILLIAM IN BENGAL.
CRIMINAL.

No. 4, *dated the 22nd March*, 1892.

1. After Rule 15, Clause (*i*), Chapter I, at page 10 of the General Rules and Circular Orders (Criminal), insert the following:—

(*ii*) Cases, of which the commitment letter is received before the commencement of a Sessions, should be tried at that Sessions and shown in the Sessions' Statement.* If a postponement to a subsequent Sessions is considered necessary, the reason should be given.

Cases committed during the progress of a Sessions should likewise be entered in the Sessions' Statement,* and should, if possible, be tried at that Sessions. In such cases, however, it must be left to the discretion of the Presiding Officer to decide whether the particular Sessions should or should not be prolonged for the purpose. If a postponement be ordered, the reason should be noted.

2. Cancel the note at the foot of page 10, *ibid.*

3. Insert the following as a note at the foot of the same page:—

* *Vide* pages 18—20 *infra.*

4. Cancel note 2 at the foot of page 20, *ibid*, and substitute the following:—

[2] See also Rule 15, Clause (*ii*) at page 10 *supra*.

NOTES.

1. A Sessions Judge is not authorized to postpone to a subsequent Sessions cases of which he has received notice before the commencement of the Sessions *next* ensuing on the ground that the number of days which he has assigned for that particular Sessions have been filled up. The number of days devoted to Sessions' duties must depend upon the number of cases committed in due time. All commitments, of which he receives timely notice before the commencement of a Sessions, should be disposed of at that Sessions, unless of course there is some good reason for postponement in particular instances (H. C. 1685, 1882).

2. All cases committed before the beginning of any Sessions should appear in the return for that Sessions (whether taken up or not) (H. C. 802 of 1883.)

ISSUED BY AUTHORITY OF THE HIGH COURT OF JUDICATURE AT FORT WILLIAM IN BENGAL.
CIVIL AND CRIMINAL.

Rule No. 7, *dated the 11th March*, 1892.

1. In Rule 37, page 148, Chapter V (Civil) / page 81, Chapter III (Criminal)' of the General Rules and Orders, for the words "the Courts mentioned in Rule 18" *substitute*—"the Court by which the money is held in deposit."

EXISTING RULES.

37. Persons desiring to draw money deposited in court and payable to them shall submit to the chief ministerial officer of the court mentioned in rule 18 an application in Form No. 7, or, in the case of a rent deposit, in Form No. 8. One copy of such form shall be supplied free of charge. In this form the applicant shall enter all particulars necessary for the identification of the credit. If it is intended to withdraw more than a single item of deposit by one application, the amount of each item and the number of each deposit must be distinctly stated.

38. The chief ministerial officer shall compare the application with the record of the case, and carefully test the validity of the claim. If he finds that the name of the payee has been correctly given, and that there is no objection to the payment of the money on the ground of attachment or otherwise, he shall make enquiry as to the identity of the applicant, and if satisfied of such identity shall sign the certificate at the foot of part I of the application, and pass on the application so signed to the accountant of the court or group of courts. Such accountant shall compare the contents of the application with the Register of Deposit Receipts, and shall satisfy himself that the amount as shown has been received and is still unpaid, and that the name of the claimant corresponds with the name of the payee entered in the Register, and taht no order for the attachment of the money is in force.

39. If the record of the case has been despatched to the record-room of the District Judge under the orders of the High Court relating to the periodical despatch of records by Subordinate Judicial Officers,* the application for payment may be made either to the District Judge or to the court in which the deposit is held. In the latter event the presiding officer shall forward the application to the District Judge whose record-keeper will certify under countersignature of that officer that a specified sum of money is due to the applicant. Such certificate on being received by the subordinate court shall then be treated as if it were a certificate granted by the chief ministerial officer of such court as provided in rule 38. If the application be made to the District Judge direct, he shall, after satisfying himself that the sum claimed is in deposit in the manner stated, and that the applicant is entitled to receive payment, order payment to be made from the District Treasury, and he shall also notify the same to the lower court so that the proper entry may be made in the Deposit Register. Payment shall in every case be entered in the record itself under the signature of the District Judge.

*See Rule 1, sub-rules 31, 37, Chapter IV.

NOTE.—The latter portion of this rule from the words "If the application" to the end is not applicable in the case of minor districts* in which there is no resident District Judge.

44. When the money sought to be drawn out of court is in deposit, not in the court to which the application is made, but in another court, as, for example, where two or more courts at one station are combined for the purposes of accounts, in every such case the duty of the court to which the application is made shall be merely to receive such application and forward it to the court of the Judge in charge, with a certificate, made after examination of the record, that the applicant is the proper party to receive payment of the amount claimed. "44. When the application is for the withdrawal of money tendered to another court, as, for instance, where two or more courts at one station are combined for the purposes of accounts, in every such case the duty of the court receiving the application shall be to forward it to the court to which the money was tendered, and that court shall, after examining the record, furnish the necessary certificate that the applicant is the proper party to receive payment of the amount claimed. In any case in which

amount has been transferred from the credit of the original payee to that of the claimant, this fact should be stated. This certificate shall be compared with the Deposit Register in the office of the Judge in charge. the amount has been transferred from the credit of the original payee to that of the claimant, the fact should also be stated, and the application returned to the Court from which it was issued. The certificate shall then be compared with the Deposit Register in the office of the Judge in charge. Such Register, if the sum is shown therein to be in deposit, will inform the Judge whether there is any bar to payment. If there be no such bar, the payment-order may be issued by the Judge in charge, and the fact of its issue shall be communicated to the court to which the money was tendered, in order to enable it to enter satisfaction for the amount upon the record of the case. Should, however, the record of the case be despatched to the district record-room, the court receiving the application shall, on receipt from the court to which the money was tendered, of the certificate as to the identity of the claimant, deal with it in the manner prescribed by Rule 39."

AMENDMENT OF THE COURT OF WARDS' ACT.

REVENUE DEPARTMENT—LAND REVENUE, No. 1470LR.

Calcutta, the 12th April, 1892.

RESOLUTION.

READ again—

Letter No. 915, dated the 20th April 1891, with enclosure, from the Registrar of the High Court.

Letter No. 1577, dated the 15th September 1891, with enclosure, from the Legislative Department of the Government of India.

Read—

Abstract of the Proceedings of a Meeting, held on the 25th March, 1892, of the Council of the Governor-General of India for the purpose of making Laws and Regulations, published in Part VI of the *Gazette of India* of 2nd April, 1892.

Under the provisions of clause (7), section 7 of the Public Demands Recovery Act, VII (B.C.) of 1880, arrears of rent and other demands recoverable as rent, on private estates under the management of the Court of Wards, are realizable by means of certificates, just as any sum of money due to Government from any private individual or others under the other clauses of the same section. This power is, however, restricted in practice by the following executive orders, which form rules 22, 23A, and 23 at pages 192-3 of the Manual issued by the Board of Revenue for the guidance of officers in the administration of Wards', Attached and Encumbered Estates:—

"At the same time it must never be forgotten that the certificate procedure is not to be looked upon as the normal method of collecting the dues of Government. The officer responsible for the collections will in all cases be expected to show to the satisfaction of the Collector that he has done his best to realize the amount by ordinary means, and that defaulters have been duly warned before the report of their names to the Collector.

LIBERALITY OF BABU DURGA PRASAD, OF GAYA.

No. 1054Med., dated Calcutta, the 9th April 1892.

From—H. H. RISLEY, Esq., C.I.E., Offg. Secretary to the Government of Bengal, Municipal Department,
To—The Commissioner of the Patna Division.

I AM directed to acknowledge the receipt of your letter No. 243G, dated 28th March 1892, with which you forward a copy of a letter from the Magistrate of Gaya reporting that Babu Durga Prasad, a banker and zamindar of Gaya, has deposited a sum of Rs. 10,000 in the local treasury as a contribution to the Gaya Branch of the Lady Dufferin's Fund, to be utilized for erecting a hospital for women in that town, to be called the "Panitra Ward," after the name of the donor's mother.

2. In reply, I am directed to say that the Lieutenant-Governor accepts the gift offered by Babu Durga Prasad on the terms proposed, and to request that you will be good enough to convey to him the thanks of His Honour for his liberality and public spirit. The correspondence will be published in the *Calcutta Gazette*.

No. 243G, dated Bankipore, the 28th March 1892.

From—D. R. LYALL, Esq., C.S.I., Commissioner of the Patna Division,
To—The Chief Secretary to the Government of Bengal.

I HAVE the honour to forward herewith copy of a letter No. 743, dated the 18th instant, from the Magistrate of Gaya, together with a copy of a letter from Babu Durga Prasad, a banker and zamindar of Gaya, offering a contribution of Rs. 10,000 to the Gaya Branch of the Lady Dufferin's Fund.

2. I approve of the suggestions made by Mr. Grierson in paragraphs 4 and 5 of his letter.

No. 743, dated Gaya, the 18th March 1892.

From—G. A. GRIERSON, Esq., Magistrate of Gaya,
To—The Commissioner of the Patna Division.

ON the eve of my departure from this district, I have much pleasure in forwarding herewith copy of a letter from Babu Durga Prasad, in which he mentions his intention of contributing Rs. 10,000 to the Gaya Branch of the Lady Dufferin's Fund. The money was paid into the treasury, to the credit of the Fund, to-day.

2. This will, I hope, enable the Committee to at once commence the erection of the proposed Zanána Hospital, which has been one of my most cherished designs for the benefit of the people of Gaya.

3. Babu Durga Prasad represents a large banking interest in Gaya Town, and has also landed property which he manages well.

4. I think that this most liberal and public-spirited contribution deserves some special recognition; and I would suggest that the gift be reported to Government, and the particulars published in the Gazette.

5. I have already thanked him in my own name, and I should also be glad if he were thanked by Government also.

Dated Gaya, the 16th March 1892.

From—BABU DURGA PRASAD, Banker and Zamindar, Gaya Town,
To—The Magistrate-Collector of Gaya.

I HAVE the honour to state that it is my eager desire to see that the Lady Dufferin Zanána Hospital at Gaya be built as soon as possible. I have therefore much pleasure in letting you know that I am willing to contribute Rs. 10,000 only towards the Gaya Branch of Lady Dufferin Fund. I beg that this humble contribution be accepted in the name of my much loved mother, to perpetuate whose memory a ward may be called "Panitra Ward," after her name.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 1·0° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

SETTLED weather, almost without interruption, has prevailed throughout the month, but the more important meteorological elements have all varied largely from their normal values.

The most notable variations are—

1. Pressure has been steadily below the normal, defect increasing towards the end of the month, till it was over ·1 inch at nearly all stations. The mean defect for the whole of March is between ·08 inch and ·1 inch except in Orissa, where it is somewhat lower.

2. Temperature during the early part of the month was very low, but owing to the hot westerly winds and cloudless skies it rose rapidly and became unusually high for the season.

3. Humidity and cloud proportion were both low, the former by about 10 per cent. and the latter by 50 per cent.

4. Rainfall was almost entirely absent except on the 5th and 28th, when showers fell in East Bengal and part of North Bengal, but in the other districts it has been either absent or very light. Sibsagar received nearly 9 inches and the other stations in Assam between one and two inches.

At the beginning of the month a shallow depression passed over the province from the west. Pressure began to fall in Bengal on the 2nd, and continued to change moderately till the 4th, when the low-pressure area was over North Bengal. Defect was nowhere more than a tenth of an inch, and though the depression was accompanied by a fairly complete cyclonic circulation of winds, its influence was very slight in causing the formation of cloud and rain. In the western districts a few very light showers fell, chiefly in Orissa, but on the 5th more general and heavier rain fell in East Bengal. After the depression had passed eastwards temperature and humidity fell rapidly, and westerly winds again set in. The difference in temperature from the normal was very slight during the day, but defect in night readings was at some stations more than 6° and at nearly all more than 3°. The mean defect for the first week was nearly 3° for the whole province. From the 5th till towards the end of the month clear dry weather prevailed with no important change except in temperature which continued to fall till the 7th, and then steadily rose. As the downward change was chiefly in the night temperatures, and the rise had most effect during the day, the range during the second week was very large. On the 6th and 7th minimum readings were below 50° at several stations in North Bengal, and below 55° at many stations in all districts, while maximum readings were generally about 85°. Till the 12th, the only stations reporting readings of more than 100° were Cuttack and Midnapore. From the 12th to the 19th excess increased, especially in Bihár, where it was more than 80°, and the highest maximum reading for the period was between 100° and 105° at nearly all stations in the western half of the province. Humidity continued low, the sky practically cloudless, and pressure underwent the small oscillations usual in fine weather, but continued on an average considerably below the normal Similar conditions prevailed till the 25th, when wind directions began to change owing to a shallow low-pressure area forming over the east of Bihár and part of West Bengal. Though pressure rose again, and the depression almost disappeared, south-easterly winds continued, and humidity became high. Weather was generally fine, but a few local storms occurred, chiefly in North Bengal. The disturbed conditions moved eastward, and local storms occurred at nearly all stations in East and North Bengal on the 28th, accompanied in some cases by heavy rain, but by the 29th they had almost entirely ceased, and during the last two days fine weather prevailed. While the depression existed strong southerly winds blew at the head of the Bay and over the province.

Pressure—As stated above, has been below the normal throughout almost the whole month. Occasionally for a short time there was a small excess, but the weekly means have been steadily below the normal by between a twentieth and a tenth of an inch. For the first week there was defect of from ·03 inch to ·05 inch at all stations. Up to the 12th there was practically no change, the same small defect prevailing in the lower districts, while at some of the northern stations it had increased to ·08 inch. After this the deficiency increased, and for the week ending on the 19th the average difference from the normal varied from ·07 inch in Orissa and Chota Nagpur to ·13 inch in the north of the province. This distribution continued till nearly the end of the month, when there was a general slow rise, but a considerable defect still remained.

Temperature—The details of the changes of temperature have been given above. The mean for the month is considerably above the normal in all districts except Orissa, where it is exactly normal. Excess in South Bihár is 2·2°, in Chota Nagpur 1·7°, in South-West and North Bengal 1°, and in North Bihár and Assam nearly 1°.

The following table shows the principal variations of the day, night and mean temperatures from the normal in each week of the month at nine typical stations in different districts of the province:—

Rainfall.—Fairly general but light showers fell in East Bengal on the 5th, and a few very light scattered showers in the other districts on the 4th and 5th, after which there was no rain anywhere in the province till near the end of the month. On the 28th general and in most cases moderately heavy rain fell in East and North Bengal and in Murshidabad, Purnea, North Bhágalpur and part of Darbhanga, South Bhágalpur, and Sonthal Parganas. A few showers fell on the 27th in Rangpur and Kuch Bihar, and scattered rain continued in Mymensingh, Jalpaiguri, Kuch Bihar, and the Darjeeling Hills till the end of the month. In consequence of the heavy falls on the 28th, North Bengal received a quarter of an inch more than the normal fall for the month, but in all the other districts there is a large deficiency varying from ·2 inch in North Bihár to 1·88 inches in East Bengal.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for The *humidity* of the atmosphere is expressed as percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station for the period in question du stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

r the week ending Saturday, the 9th of April 1892.

CALCUTTA, *the 12th April* 1892.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 9TH OF APRIL 1892.

At the beginning of the week pressure was above the normal in all districts, excess being small in Chota Nagpur, whence it increased towards the north-east. In consequence isobars ran nearly north and south, and a strong easterly circulation of winds prevailed in the north of the province, while in the south and west the westerly element in the wind directions was either absent or very faint. Temperature was high, especially in the northern districts, and fine clear weather prevailed. The pressure distribution remained unchanged on the 4th, but unsettled conditions developed in Assam and North Bengal. Local storms were frequent, and moderately heavy rain fell at nearly all the north-eastern stations accompanied by a rapid fall in temperature. Pressure also began to give way, and a brisk fall continued for three days, after which the distribution was practically normal. The thunderstorms spread towards the south-west, and were fairly general in Lower Bengal on Monday the 4th, causing almost general but very irregular rainfall. The period of disturbance was soon over, and though pressure continued to fall, only a few light scattered showers were reported after the 5th. On the 7th the relative difference of pressure at eastern and western stations was much smaller, and dry south-westerly winds recommenced in South-West and East Bengal. The temperature had continued high during these days in Bihár and Chota Nagpur, where very little rain fell. After the storms ceased in the other districts there was a quick rise, and by the 8th readings were everywhere as high or higher than at the beginning of the week. The steady fall of pressure continued till the end of the week, on the last day of which readings were everywhere below the normal, the largest defect being in North Bengal. The easterly current over North Bengal and North Bihár was weaker, and directions had changed to west at most of the stations in South Bihár. With this change of winds temperature rose rapidly, especially in Chota Nagpur and Orissa, and excess at the end of the week varied from 1° in the east of South-West Bengal to nearly 9° in the west of Bihár.

Pressure—As stated above, was very high during the first three days of the week, when excess ranged up to ·15 inch in North Bengal and Assam. As at that time excess in Chota Nagpur was only about ·02 inch, gradients were much steeper than usual from west to east. The brisk fall that set in about the middle of the week continued to the close, and the distribution then differed very little from the normal, defect being more than ·05 inch only at a few stations in North Bengal. The means for the week are above the normal at all stations by amounts varying from ·02 inch in Chota Nagpur to ·07 inch in North Bengal and North Bihár.

Temperature—Continued very high in the western half of the province, and was above the normal in the eastern districts, except between the 4th and 6th when local storms occurred. In Bihár and Chota Nagpur excess was unusually large, ranging in places up to 8°. In East and North Bengal mean excess is 1°, in Orissa and South-West Bengal 1·2,° in Chota Nagpur and North Bihár nearly 4°, and in South Bihár 4·1°. The lowest temperatures were registered on the 4th and 5th except in Orissa, part of South-West Bengal and part of North Bihár where they occurred on the 6th and 7th. The highest readings were on the 9th at nearly all stations.

Rainfall.—Showers began in North Bengal on the 4th and extended on the 5th over the greater part of the province. The falls were general and moderately heavy at the northern stations, but towards the south and west they became much lighter and more scattered. No rain fell in Chota Nagpur, and only a few very scattered showers in Orissa and South Bihár. The only rain reported from North Bihár fell in Purnea and North Bhágalpur. The average falls for the week are below the normal except for North Bengal, where nearly twice the normal fall has been received, and Orissa, where the amount is practically normal. For Bihár the average is less than ·1 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 9th of April 1892:—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; ≤, lightning.

Relative to Ports Iloilo and Sebu.

NOTICE to Mariners No. 106 of 1892, issued by the British Admiralty, is republished :—

The following information relative to ports Iloilo and Sebu has been received from Mr. R. Campbell, commanding the British steam-vessel *Elton* :—

PANAY ISLAND.

(1) PORT ILOILO—BUOYAGE, LIGHTS, &c.

Oton bank, at the southern entrance to the strait of Iloilo, has shoaled, and extended in a southerly direction. The south and west extremes of this bank are each marked by a *can* buoy, painted red and white.

A narrow bank, extending about 7½ cables in a N.E. by N. and S.W. by S. direction, with 3 fathoms water on it, has formed on the eastern side of the strait of Iloilo. The south-west extreme of this bank is marked by a *conical* buoy, painted red and white in vertical stripes, and moored with point Kabalik bearing about S.S.E., distant 2 cables.

The wreck, charted as lying off the ruined fort at Iloilo, has been removed.

SEBU ISLAND.

(2) PORT SEBU—BUOYAGE AND LIGHTS.

The three buoys charted as marking Tambon and Lagundi shoals, at the southern entrance to port Sebu, were not in position and should not be relied on. The other buoys in the approaches to Sebu were in place, and a *conical* buoy, painted red, has been moored near the outer extreme of the extensive spit off fort Sebu.

The light (*fixed green*) on point Lanis may be depended upon in all weathers. Lipata bank light (*fixed red*) is not to be relied on in bad weather, with southerly winds.

At *fixed white* light is exhibited from near the top of St. Nicholas church at Sebu, and a *fixed red* light from Sebu fort.

Approximate position of fort Sebu lat. 10° 17½′ N., long. 123° 54′ E.

JAPAN—KIUSIU—WEST COAST.

Non-existence of rock awash northward of Oo tate.

THE British Admiralty has given notice (No. 88 of 1892) that a close examination has been made, under favourable circumstances, in the locality of the rock awash marked D, lying about 5 cables northward of Oo tate (Odate jima), or in approximately lat. 33° 2′ N., long. 129° 26½′ E., and that no indications of its existence were seen.

As this rock was not found when searched for by H.M.S. *Sylvia* in 1868, and as the Japanese fishermen are not aware of the existence of any such danger, it has been expunged from the Admiralty charts.

(2) *Sunken rock eastward of Ko tate.*

Also, of the existence of a sunken rock, about half a cable in extent, with 3½ fathoms water over it, and 13 to 14 fathoms close around, lying about (its northern edge) 3½ cables E.N.E., from Ko tate (Bonnet) or Kodate jima, and with the north extreme of that islet in line with Minamize.

Approximate position: lat. 33° 0′ 30″ N., long. 129° 27′ 35″ E.

(3) *Sunken rocks in the approach to Nagasaki harbour.*

Approximate position : lat. 32° 42′ N., long. 129° 44′ 30″ E.

FAMINE RELIEF WORK IN NORTH BENGAL AND BIHAR.

REVENUE DEPARTMENT—AGRICULTURE.

Calcutta, the 16th April, 1892.

RESOLUTION No. 1529.

READ—

The revised Bengal Famine Code published in the *Calcutta Gazette* of the 20th January 1892.

Read also—

Correspondence with the Commissioners of the Patna, Bhágulpur and Rajshahi Divisions, regarding the present scarcity in parts of those Divisions.

THE Lieutenant-Governor finds there are certain points in which the Revised Famine Code is not precisely suited to the exact stage of distress which has been reached at present in Bengal. It does not seem necessary to alter the Code; but the following instructions are meant to show in what respects it may, for the time, be modified with advantage.

CLASSIFICATION OF WORKS.

2. The terms, Civil Agency Works and Professional Agency Works, used in the Code, are not very suitable to the conditions of Bengal, where the Professional Agency, *i.e.*, the Public Works Department, is weak, and the Collector of the district has at his side the District Engineer and his staff who are able to give professional help in any work he sets going with funds supplied by the District Board. It is necessary, however, to adhere to these terms, which are suitable to other provinces of India, with this explanation.

Professional Agency Works are works carried out with Provincial funds and under officers of the Public Works Department. They will generally be large works, such as railway branches, canals, &c. There are at present no such works started in the affected districts.

Civil Agency Works are those which are carried out by the Collector, with such help as he requires from the District Engineer and his subordinates, and with funds supplied by the District Board. They include what were formerly called agricultural works, and consist generally, as explained in section 26 of the Revised Code, of the construction of new roads, the raising or enlargement of old roads, the construction or renewal of tanks, drainage channels, irrigation channels, and embankments. All relief works now carried on in this province belong to this class.

CLASSIFICATION OF WORKERS.

3. The Revised Famine Code (section 31) divides labourers on relief works into—

A—Able-bodied persons accustomed to labour.

B—Able-bodied persons not so accustomed.

C—Persons not able-bodied, but fit for light employment.

Also under section 53, infirm persons dependent on the labourers are allowed to remain on the relief work, and receive the minimum wage (see also column 17, Form I, page 32, of Revised Code).

The Government of India has recently called for a monthly report in which the numbers on relief works are shown in four classes, the Class A as above defined being sub-divided, thus—

I—Able-bodied persons accustomed to labour of the kind required on relief work.

II—Able-bodied persons accustomed to labour, but not to labour of the kind required on the relief work.

It is obvious that in both these cases the classification requires some knowledge of the past life-history of the labourer. This is difficult to get, and can hardly be got with sufficient accuracy to be of use: if the labourer has any suspicion that the information he gives will be turned against him, he will try to deceive the enquirer by giving false replies as to caste and village: and if the classification is left to the officer in charge of the Relief Work, it will not be uniform. As a matter of fact, His Honour finds that the classification practically adopted on almost all the Relief Works he has visited is as follows:—

(*a*) *Persons who are paid by piece-work.*—A pit containing so many cubic feet of earth is measured off for a gang of labourers, and when it is finished they are paid the stipulated sums, provided that they do not thereby receive more than the maximum daily wage for the number of days employed on the work.

(*b*)—*Persons who are paid by task work*—Their work is similarly demarcated for them, and they are stimulated to do what is held to be a fair day's task for people of their calibre for a three-quarter wage. If they do less, they are fined, but never get less than the minimum wage.

(*c*)—*Persons who are paid by daily labour.*—Their work is not measured, but they are encouraged to do what they can, and they receive the minimum wage.

4. This classification is the result of the natural selection of the fittest, and is in accordance with facts, and His Honour thinks it may be accepted. During the present stage of affairs, and till further orders are issued, the labourers will be classed in this way, and the daily register and the weekly return sent into head-quarters will be filled up on the understanding that A, B, and C are interpreted as above. In the monthly return supplied to the Government of India, the first three of the columns shewing number of labourers will be taken as equivalent to A, B, C, as above, and the fourth column will contain the infirm dependants mentioned in section 53 of the Revised Code.

It further seems desirable, and in accordance with facts, to divide children, that is, young persons of either sex who are approximately below 14 years of age, into two classes, big children (say above 8) and small children. The former are seen handling a kodali or carrying a small basket; the latter often

carry clods of earth on their heads, but hardly assist appreciably in the outturn of work. They should, however, be counted in the muster-roll and receive a small wage.

PIECE-WORK.

5. The system of piece-work is encouraged by section 35 of the Code, but only faintly. The reason is that the Code contemplates a much worse state of things than at present exists. So far as Sir Charles Elliott has seen, the distress in Bengal has been taken in time. The people are as fit to work and as strong as they ever were. He has not met with half-a-dozen cases which showed any signs of emaciation or weakness due to hunger. In these circumstances piece-work should not only be encouraged, but insisted on as the general rule; probably about nine-tenths of the labourers should be classed as A, and the rest as B and C. Officers in charge of relief works should do their utmost to distribute all their able-bodied labourers into small gangs, allotting to each a pit which will occupy them at least one day, and, better still, two or three days at the end of which the work will be measured and they will be paid.

THE AMOUNT OF WORK TO BE DONE.

6. Mr. King's formula,* which has been circulated with the Commissioner of Patna's report of the 21st March, is based on the assumption that—

* $R = W\left(A + \frac{L+50}{12{\cdot}5}\right)$.

(1) a man can cut 100 cubic feet of hard soil in a day; 150 of soft soil;
(2) a man can carry 125 cubic feet of soil for 50 feet in a day, with a 5-foot lift;
(3) he can carry the same quantity for an additional 100 feet in another day.

Allowing for a woman doing a little less carrying than a man, we may lay down the following rule:—

A man and woman working together can cut and carry 100 cubic feet for a 50-foot lead, and a man and two women can do the same for a 150-foot lead. Therefore, the piece-work rate for 100 cubic feet should be the maximum ration wages for a man and woman for a 50-foot lead, and similar wages for a man and two women for a lead exceeding 50 feet, or a lift exceeding 5 feet.

In the case of task-work, which is only permitted for persons of a slightly inferior physique, it will be necessary to allow a further margin: for instance, it might be said that 100 cubic feet is the daily task for one and two women (or a man, a woman and a child), and a similar addition should be made for any increase in the lead.

THE WAGE.

7. The mode of calculating the wage, *i.e.*, the value of the full or portional ration, is elaborately described in Chapter XIV of the Revised Code. It is not, however, desirable ever to fix the wage in pies, a coin not commonly used in the villages. Nor is it desirable, having once fixed it, to raise or lower it according to any minute variations in the market, that is, by less than a pice at time. Moreover, prices are so even now over the whole distressed area that in districts it seems possible to fix a uniform wage for all districts in Bihár and North Bengal, and thus to avoid the danger of emigration from the neighbourhood of home to a district where the labourer may be told he will receive a higher wage. The only difference that seems needful to make is this, that where cheaper grain, such as marwa, kurthi or makai are procurable, and are the customary food of the people, the calculation should be made for a ration compounded of those grains, or for a ration compounded half of rice and half of some cheaper grain, and not for rice alone. Details are given in Appendix, showing how the different value-rates are worked out.

The Lieutenant-Governor thinks it will, therefore, be proper to decide that for the present, and till further orders, the following wages be given—

A.—In districts where coarse rice is the usual food, or the only food easily procurable—

	Man.	Woman.	Big child.	Small child.
	Pice.	Pice.	Pice.	Pice.
Full ration wage ..	6	5	3	2
Three-quarter wage ..	5	4	2	1
Minimum wage ..	4	3	2	1

B.—In districts where cheaper grains are procurable, and are the usual food of the labourers—

	Man.	Woman.	Big child.	Small child.
	Pice.	Pice.	Pice.	Pice.
Full ration wage ...	5	4	3	2
Three-quarter wage ...	4	3	2	1
Minimum wage ...	3	2	1	1

The Commissioner of the Division will decide whether a district should be classed as A or B.

8. It will follow from this that the piece-work and task-work rates should be fixed, so as to approximate as nearly as possible to the following figures:—

	Per 100 cubic feet with a 50′ lead.		Per 1,000 cubic feet with a 50′ lead	
	A districts.	B districts.	A districts.	B districts
	As.	As.	Rs. A.	Rs. A.
Piece-work	$2\frac{3}{4}$	$2\frac{1}{4}$	1 $11\frac{1}{2}$	1 $6\frac{1}{2}$
Task-work	$3\frac{1}{4}$	$2\frac{1}{2}$	2 $0\frac{1}{2}$	1 9

with five and four pice added in A and B districts, respectively, for every additional 100 feet of lead.

These figures, however, are given only as a general indication, and in order to attain some degree of uniformity, and avoid such differences as a recent report disclosed, where one district was paying for piece work 1 anna per 100 cubic feet, and another was paying 3 annas. It is not intended hereby to fetter the discretion of Collectors, who must fix the rates for piece-work on the basis of actual observation of what the labourers can do and earn.

9. It should be understood, in case professional workers like bildars, nunias, &c., who could perhaps do double the calculated tasks in a day, come on the works, that no one is permitted to earn more in a day than the maximum daily wage as above calculated.

10. Prices must, however, be carefully watched, and if any rise or fall in the market rates, sufficient to alter the calculated value of the ration-wage by one pice, takes place, the alteration should be made by the Collector, and reported immediately for the approval of the Commissioner, and the fact should be noted in the next half-monthly report.

11. These figures apply mainly to the task of cutting and carrying earth, as in excavating a tank, or in throwing up a raised road. In the latter case the work of patting and consolidating the earth should be given to C, that is, daily labour people; the final dressing and making up must be done by the practised workmen of the District Engineer, not by relief labour.

Registers and Returns.

12. Four registers are required on a relief work—

First, the muster-roll, on which the attendance of the labourer for every day of the month will be entered. The arrangement should be—*firstly*, the mate in charge, and *secondly*, the village: under each village the names of the labourers should be entered, with the caste and class and description of each (*i.e.*, men, women, big child, or little child, and, A, B or C); a mate can generally hold charge of about 100 labourers.

Second, the muster-roll of infirm dependents allowed on the work under section 53 of the Revised Code, receiving the minimum wage.

Third, the measurement-book for piece-work or task-work. This shows the people by gangs, and the work done each day. Each pit should be numbered, and the number given it in the book should be scratched on the bottom of the pit, so that an Inspecting Officer coming round within the next two or three days, may be able to test the entry in the book by actual measurement.

Fourth, the Daily Registers showing for each day of the month the number of labourers, A, B, and C, the work done, and the money paid. (This supersedes Form I of the Relief Code). The total of column 24 in this register

should agree with the daily total of the muster-roll, and the figure in column 11 should agree with the total of column 6, in the measurement-book.

Copies of these forms, filled up with exemplar figures, will be found in the Appendix.

13. The Daily Register should be written up every day by the relief work officer; and on the last evening of the week he should send a copy of the week's figures to the Collector or the officer to whom he is immediately subordinate, arrangements being made that the return may certainly reach the district head-quarters by Monday evening. This may be effected by sending in a special messenger or by the district dák. If necessary, a staff of dák runners may be put on for the purpose and charged to the Zamindari Dák Cess. This copy of the Daily Register supersedes Form No. 2, page 33, of the Revised Code.

Gratuitous Relief.

14. No modification is required of the instructions in Chapter III concerning gratuitous relief, except as regards the provision in section 22 that the dole should be of flour. In this province flour is not commonly used. The dole should be of rice, or marwa, or kurthi, or makai. Where the cheaper grains can be easily procured, and are commonly eaten by the people, the dole may be confined to them; elsewhere it may consist half of rice and half of makai or other cheaper grain, if procurable.

Three registers of gratuitous relief are required, and the forms are given in the Appendix.

The first is the Register of Relief. It shows, village by village, the name of each recipient, the age and sex and caste, causes of disability, and the signature of the investigating officer. It provides also for the removal of the name.

The second is the muster-roll, and shows briefly who attended at each distribution, the total number, and the amount distributed.

The third contains the names of those who receive cotton to spin or any other work of the kind, the quantity given out and the quantity returned, with date.

Each person entered in the register of gratuitous relief should receive a stout card-board ticket, about four inches square, showing the circle number, village number, and name.

15. The Lieutenant-Governor finds that the practice recommended in section 22 of the Code, of giving to the paupers tickets entitling them to receive the dole from a bunnia, is not approved in this province, and the practice everywhere appears to be to make the distribution at fixed centres on a fixed day before a responsible officer, such as a Deputy Collector or Sub-Deputy Collector. This is undoubtedly the better way, so long as the numbers are small enough to admit of it.

16. The officer in charge of this form of relief must send in weekly a return showing the number of persons on gratuitous relief—men, women, and children, and the amount disbursed. This must be made up to the close of the last day of the week, and must reach the district head-quarters by Monday evening. The arrangements for forwarding this return will be the same as those described in paragraph 13 of this note, above.

Reports and Returns of Famine Relief sent by District Officers to the Commissioner or to Government.

17. The Collector has two returns to submit:

One is a weekly one, to be sent by telegraph to Calcutta to the Under-Secretary, Revenue Department, every Tuesday, in order that it may be embodied in a report which the Bengal Government has to submit to the Government of India every Wednesday. It contains the following figures for the preceding Saturday:—

	Men.	Women.	Children.	Total.
On relief works ...				
On gratuitous relief ...				

The figures of the first line will be supplied from those against the last day in the week in the return sent in by each Relief Work officer under paragraph 13 above, and those of the second line from the figures sent in by each officer in charge of gratuitous relief under paragraph 16 above.

Each Collector must fix the last day of the week for each relief work and relief circle, with reference to its distance and the route the return has to take, so that it may reach district head-quarters by Monday evening. As far as possible, the work should be made to end on Saturday. But if the return for such a week cannot reach head-quarters by Monday, then Friday or even Thursday must be fixed. But punctuality in the receipt of these two returns every Monday evening is essential.

18. The second is a half-monthly report. It should be despatched on the 2nd and 16th of each month, and should reach the Commissioner by the 4th and 18th. In every three months five of these reports will be based on the weekly figures of two weeks, and one on the figures of three weeks. Each report should therefore begin by saying: The figures of this report relate to figures of the weeks ending so and so, and so and so. The reports which at present reach Government are excellent of their kind, and need but little alteration. The Government of India desires that attention should be paid to the monthly death-rate, especially if there is any reason to believe that any increase in it is due, directly or indirectly, to famine; and each report should contain abstracts from the weekly returns sent in from each relief work, showing the average number of labourers (A, B, C, and total) on the work during the week; the total earthwork done, total expenditure (see paragraph 13), &c. For gratuitous relief a statement should be drawn up, showing for each circle the number of persons receiving doles, men, women, and children, and the total expenditure of the week (as in paragraph 16).

19. With the second half-monthly report for each month, a map showing the affected area in the district should be submitted in duplicate, the tracts seriously affected being coloured dark-blue, and those slightly affected light-blue. Also the two statements desired by the Government of India should be submitted. Copies of these are attached to this Resolution. In Statement A, the first five columns should be filled up once for all. Columns 6, 7, 8 are the total number of A, B, and C labourers on the last day of the last week of which the return has been received, and column 9 will be the figure in columns 17 and 18 of the weekly return for dependents. Column 11 will be the total number receiving doles in the last preceding week. In columns 12, 13, 14 should be entered coarse rice, and such other cheap grains as are used for food by the labourers, *e.g.*, marwa, kurthi, makai, at present. Column 15 should show the district death rate which the Collectors should obtain direct from the Civil Surgeons, the name of the month for which the figure is given being written above it.

In Statemennt B, columns 1 and 2 will be filled up once for all; column 3 will be blank as the programmes have not been gazetted.

Column 4 will show works employing 300 persons and over for three months; column 5, the smaller works.

Columns 6 and 7 will be columns 4 and 5 minus the numbers shown as employed on relief works from the beginning up to date. Columns 8, 9, 10, 11, 12 will henceforth contain figures of expenditure, starting from 1st April 1892.

Column 13 will not be filled up, unless the land revenue has been suspended by a definite order of Government or of the Board of Revenue.

ORDER—Ordered that this Resolution with its appendices be published in the *Calcutta Gazette*, and that copies of it be forwarded to the Commissioners of the Patna, Bhágalpur, and Rajshahi Divisions for communication to the Collectors of their Divisions.

Explanation.—.....indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are ; the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least of rain has fallen.

CUTTA, *the 19th April* 1892.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 16TH OF APRIL 1892.

THE general distribution of pressure at the beginning of the week differed very slightly from the normal, the greatest defect being about one-thirtieth of an inch in North Bengal and South Bihár, while a very slight excess was marked at a few stations in Eastern Bengal and Orissa. Temperature was generally considerably above the normal, more especially in the north and west of the province and in Bihár. Humidity was high, due to the strong southerly winds which have steadily prevailed for several weeks in the north-west angle of the Bay, and which have formed so prominent a feature in the meteorology of the month.

For the first two days of the week no rain fell, except in a small area included in the Pabna and Bogra districts of North Bengal and in two of the out-stations of Mymensingh. On Monday, the 11th, a slight increase in pressure took place in North Bengal, which was followed on Tuesday by a moderate to rapid increase all over the province. Rain fell at all stations in North Bengal except the Rangpur, Jalpaiguri, and Kuch Bihár districts, in the Jessore district and at a few other stations. Temperature consequently fell in North Bengal but continued about 4° above the average in Bihár. During the next three days the barometer did not alter much at any one station, but a marked increase became apparent in the baric gradient from east to west, and winds assumed a more easterly set over the greater part of the province. This, and a rather rapid fall of the barometer on Saturday, conspired to give local storms amounting to general rain to the greater portion of South-West Bengal, the whole of North Bengal, the Purnea, North Bhágalpur and Darbhanga districts of North Bihár, the Monghyr and South Bhágalpur districts of South Bihár, the Sonthal Parganas and a considerable portion of Chota Nagpur. At the same time temperature fell generally, and at the end of the week it is below the normal at nearly all stations especially so in South and Central Bengal.

Pressure—Has not varied very largely from the normal during the week, the barometer having remained fairly steady. The relative distribution has increased the gradient slightly from east to west. The week closes with a defect of about one-tenth in Chota Nagpur, while in Assam the barometer is slightly above the normal.

Temperature—Continued very high on Sunday and Monday; on Tuesday it began to give way and was actually below the normal in a belt reaching through South Bengal and Assam, but above the normal elsewhere. This state of things continued with slight variation until Saturday, when the general rainfall had the effect of reducing the temperature below the normal at almost all stations.

The following table shows the excess or defect of the actual mean temperature from the normal for the week ending 16th April 1892:—

Rainfall—Has been general, owing to local storms in all divisions except Orissa, the amounts being small in all cases. The average for North Bengal is 1·26", for South-West Bengal half an inch, North and South Bihár and East Bengal one-third of an inch. In all these cases the fall exceeds the normal for the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 16th of April 1892:—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; t, thunder; <, lightning; p, passing temporary showers.

RESOLUTION.

In his Despatch, No. 104, dated 12th September 1889, the Secretary of State for India in Council announced the decision at which he had arrived on the recommendations made in the Report of the Commission appointed in 1886 to consider the question of the admission of Natives of India to higher and more extensive employment in the Civil Administration of the country.

2. The Secretary of State's Despatch having been communicated to the Local Governments and Administrations for consideration, and their replies having been received, the Governor-General in Council is now in a position to pass orders upon the most important points calling for determination.

[illegible] appears that the Provincial Service in Assam is largely recruited from Bengal, and that it would be almost, if not quite, impossible, in view of the progress in education and the administrative aptitudes of the people, to find within any time which can now be foreseen an indigenous officer who could be utilized in one of these posts. Assam must therefore, like Burma, for the present remain outside the scope of the present orders.

5. Dealing in the first instance only with the superior appointments, and reserving for the next paragraph the case of Joint and Assistant Magistrates and Collectors, the following are the rates of pay for officers of the Provincial Service in each grade, which the Secretary of State has sanctioned :—

These rates of pay will, of course, be liable to alteration at any time should the interests of the public service require it.

6. The Government of India have determined, with the approval of the Secretary of State, to amalgamate the scheduled posts on the Executive side subordinate to the headship of a district with the existing grades of Deputy Magistrates and Collectors.

These posts are the following :—

Madras	7
Bombay	9
Bengal	8
North-Western Provinces and Oudh	9
Punjab	3

In all these Provinces the majority of them are at present held by Statutory Civilians appointed under the rules of 1879, while in some they are still occupied by officers of the Civil Service of India or Commissions appointed before 1882. Until these Statutory Civil Servants are provided for, either by promotion or by amalgamation with the new Provincial Service, the posts which they hold cannot be thrown into the general cadre of the latter service; but when that happens, and when the prior claims of officers of the Civil Service of India and Commissions have been satisfied, the posts now specified should be distributed as follows among the existing grades of Deputy Magistrates and Collectors and Extra Assistant Commissioners :—

Madras.

	Rs.
2 posts in the 1st grade on ... (corresponding to Sub-Collector.)	700
4 posts in the 3rd grade on ... (corresponding to Head Assistant.)	500
1 post in the 5th grade on .. (corresponding to passed Assistant.)	300

Bengal.

2 posts in the 3rd grade on ... (corresponding to Joint-Magistrate, 1st grade.)	600
2 posts in the 4th grade on ... (corresponding to Joint-Magistrate, 2nd grade.)	500
2 posts in the 5th grade on	400
2 posts in the 6th grade on ... (corresponding to Assistant Magistrates on Rs. 500 and Rs. 450 respectively.)	300

Bombay.

3 posts in the 3rd grade on ... (corresponding to First Assistant.)	600
4 posts in the 4th grade on ... (corresponding to Second Assistant.)	500
2 posts in the 6th grade on ... (corresponding to passed Assistant.)	300

North-Western Provinces and Oudh.

	Rs.
4 posts in the 5th grade on ... (corresponding to Joint-Magistrates and Assistant Commissioners, 1st grade.)	600
5 posts in the 3rd grade on ... (corresponding to Joint-Magistrates and Assistant Commissioners, 2nd grade.)	400

Punjab.

1 post of Extra Assistant Commissioner, 3rd grade, on ... (corresponding to Assistant Commissioner, 1st grade.)	600
1 post of Extra Assistant Commissioner, 5th grade, on ... (corresponding to Assistant Commissioner, 2nd grade.)	400
1 post of Extra Assistant Commissioner, 6th grade, on ... (corresponding to Assistant Commissioner, 3rd grade.)	300

7. The addition of these posts to the cadre of the Provincial Service will necessitate recruitment in the lower grades to supply the place of those who will be moved up to fill them; and this can take place at once where the condition of the Service demands it. Those Statutory Civilians who were appointed in the various provinces in 1889 and 1890 on the understanding that they would be transferred to the Provincial Service when it was constituted should now be gazetted to their appropriate places in that Service. In accordance with the decision of the Secretary of State, they will, like other Statutory Civil Servants who join the Provincial Service, be understood to have a preferential claim for promotion to the scheduled posts, subject, of course, to the special claims of members of the Civil Service of India and officers of the Commissions appointed before 1882) over the other members of that Service.

8. The Statutory rules of 1879 now require the approval and sanction of the Governor-General in Council to all nominations made by Local Governments. These nominations are at present ordinarily to offices in the subordinate ranks of the Covenanted Civil Service. The subordinate posts included

in the list being thrown open to the Provincial Service, the Local Government will no longer require the sanction of the Government of India to appointments to them. His Excellency in Council, however, thinks that for the present it will be necessary to retain the rule requiring such sanction in the case of appointments (whether permanent or officiating for a period exceeding three months) under the Statute to Headships of Districts and District Judgeships in Madras, Bombay, Bengal, and the North-Western Provinces and Oudh, and to Headships of Districts, Divisional Judgeships, and Settlement Collectorships in the Punjab. He is willing that in the case of all other scheduled appointments the Local Government should nominate without reference to him. He is also willing that in the case of officiating appointments of Provincial Officers for short vacancies, not exceeding three months at a time, to Headships of Districts and the other posts mentioned above, such reference should be dispensed with. Such short vacancies will afford the means of testing an officer's fitness for more extended employment in those posts; and, in reporting for sanction nominations for longer periods, it should always be stated whether an officer has been tried in this manner, and with what result. As a general rule the Governor-General in Council thinks that it will be prudent to take every suitable opportunity of thus ascertaining an officer's capacity before proposing to employ him permanently in these important and responsible posts. His Excellency in Council also desires to correct the impression which appears to have prevailed in some quarters that it will be necessary for a Provincial Civil Servant to go through the whole succession of subordinate grades in the Executive or Judicial Service before he can be selected for a scheduled post. On the contrary, it will always be desirable to select persons for higher executive office who, while they have given proof of distinguished ability by sufficiently long service, are still comparatively young and possess that bodily activity which is a *sine quâ non* for such employment. Every appointment of the kind must be based wholly upon fitness and merit, seniority being regarded only when the claims of two or more officers who are equally fit come into competition. Nor does the Governor-General in Council intend that selection should be less absolute or more restricted to the higher grades of the Provincial Service in the case of judicial appointments. It has been too much the custom to regard promotion from grade to grade of the Subordinate Executive and Judicial Services as a mere matter of seniority; and it should be made publicly known that every Government and Administration reserves liberty to make promotions in these grades without regard to seniority.

9. In Appendix A attached to this Resolution will be found an example of the form in which the Government of India think that the list of appointments open to the Provincial Service should be published by the Local Government. Each Local Government should frame and issue its list accordingly. In the Quarterly Provincial Civil List this form should, with the omission of the last paragraph, be prefixed to that division of the list which exhibits the appointments held by members of the Provincial Service. In lieu of the last paragraph, a note should be entered in the list of subordinate offices against each grade to which additions have been made referring to the notification, and stating that "To this grade appointments have "been added as representing the same number of appointments of "now treated as open to the Civil Service."

10. The Government of India recently directed that each Statutory Civilian appointed before the close of 1889 might be called upon to choose whether he would retain his present position or be transferred to the Provincial Service with an acknowledgment of his preferential claims to promotion to scheduled appointments before other members of the Provincial Service. As regards Bengal, Madras, the North-West Provinces and Central Provinces, only one Statutory Civilian has elected to enter the Provincial Service. In Bombay and the Punjab they have not yet made their election. But as it is not improbable that some obscurity may still remain in the minds of the officers who were called upon to make their election in regard to the advantages and disadvantages to them of the transfer, a further opportunity ought to be afforded these gentlemen of reconsidering the decision at which they have provisionally arrived. The Governor-General in Council will address Local

Governments and Administrations again on this subject in a separate communication.

11. The present Uncovenanted Service Leave and Pension Rules, or, in other words, the provisions of Part III, Chapter XIV, of the Civil Service Regulations regarding leave, and of Part IV, Chapters XV to XIX, regarding pension, will be applied to the Provincial Service. But the present Statutory Civilians, whether they enter that Service or not, will continue to be governed by the Leave and Pension Rules now applicable to them.

12. After considering the suggestions made by the Local Governments and Administrations, the Governor-General in Council has prepared a revised draft of Rules for the appointment of Natives of India to offices reserved under the Statute of 1861, which will be submitted in due course for the sanction of the Secretary of State for India in Council, and, if approved by him, will be published for general information.

13. As regards the rules for admission to the Provincial Service in each Province, and the precise place where the line should be drawn between the Provincial and Subordinate Services, the Government of India propose to address the Local Governments and Administrations separately, as there are great differences in the circumstances of the several Provinces and the classes from which the local officials must be drawn.

ORDER.—Ordered that this Resolution be communicated to Local Governments and Administrations, and that it be published in the *Gazette of India* for general information.

[True extract.]
C. J. LYALL,
Secretary to the Government of India.

REVENUE DEPARTMENT.

REVISED ADVERTISEMENT.

A Dictionary of the Economic Products of India

BY DR. GEO. WATT, C.I.E.

Reporter on Economic Products.

Published under the authority of the Government of India in the Revenue and Agricultural Department.

The first five volumes of this work are now ready for issue, and intending subscribers are invited to register their names with the Superintendent of Government Printing, Calcutta.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European

names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets; &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Vol. II embraces the letter C in 689 pages; Vol. III contains the letters D, E, F and half of G. Vol. IV latter half of G to middle of L; and Vol. V contains the latter half of L to end of "O." The whole work will, it is expected, be completed in seven volumes during the current year; but an eighth volume may also be issued consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a Glossary of the vernacular and European names of the plants, animals and minerals of India, and as such will be a work of reference, which, it is hoped, may prove of considerable value.

The period of registration of subscribers' names having expired on the 1st October, the price will in future be in India Rs. 45 and in England 3 guineas, payable in advance, for the complete set (exclusive of the Index, for which a separate charge will be made). An extra charge for packing and postage will be made for the set—in India, at 8 annas per volume, and for England, at 2 rupees 6 annas per volume.

For copies bound in half calf or half morocco, Rs. 6 and 8 shillings respectively will be charged extra for the whole sets.

No copies will be issued to non-subscribers till the work is complete, and no single volume will be sold separately.

PART IV.

Bills of the Bengal Council.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

THE following Bill was introduced and read in the Council of the Lieutenant-Governor of Bengal for the purpose of making Laws and Regulations, and referred to a Select Committee on the 23rd April, 1892, and is hereby published for information together with a Statement of its Objects and Reasons :—

STATEMENT OF OBJECTS AND REASONS.

THE present Bill has been prepared to give effect to such of the proposals of the Police Committee of 1890-91 as have been accepted by Government in regard to the reconstitution of the village police. The Bill provides for the introduction of the Act into all villages, irrespective of the number of houses they contain. It is proposed that the Magistrate may, with the consent of the Local Government, arrange for the election of a panchayet by the rate-payers in any manner most convenient. It is left to the Magistrate, and not to the panchayet, to determine the number of chaukidars to be employed, and to fix the salary of the chaukidars within certain limits. The appointment of a chaukidar will rest with the Magistrate, on the nomination of the panchayet, and will no longer be made by the panchayet. The powers of arrest by a chaukidar have been extended so as to bring the law into accordance with the general practice. The appointment of a tahsildar is authorised not only as now on the application of the panchayet, but also at the discretion of the Magistrate, when he finds that collection is badly carried out and the chaukidar not regularly paid. Fines and penalties will be credited no longer to the Chaukidari Village Fund but to a District Chaukidari Reward Fund, the control over which will rest with the Magistrate. In other respects there are small modifications of the existing law. It is not considered expedient at present to undertake any legislation in regard to Part II of the Act relating to chákarán lands.

H. J. S. COTTON.

No. 1 OF 1892.

A Bill to further amend the Village Chaukidari Act, 1870.

WHEREAS it is expedient to further amend the Village Chaukidari Act, 1870: It is enacted as follows :—

Preamble.

1. This Act shall be read with, and taken as part of, Bengal Act VI of 1870, as amended by Bengal Act I of 1871 and Bengal Act I of 1886; and it shall extend to all districts in which the said Act so amended is now or may be hereafter in force.

Commencement and extent.

2. For section 3, as amended by section 2 of Bengal Act 1 of 1886, the following shall be substituted :—

The District Magistrate may,

Provided that no panchayat shall be appointed in any place to which the Bengal Municipal Act, 1884, has been, or may hereafter be, extended.

The District Magistrate shall determine the number of chaukidars to be employed in a village :

Salaries to be provided by assessment.

The panchayat shall impose an assessment yearly in each village equal to the amount required for the pay and equipment of the chaukidars, together with fifteen per cent. above such amount, in order to provide for payment of the expenses of collection and losses from the non-realization of the rate from defaulters.

7. For section 14, the following shall be substituted :—

(2) The District Magistrate, and the panchayat with the sanction of the District Magistrate, may, from time to time, dismiss any chaukidar so appointed.

9. Sections 36 and 37 are hereby repealed.

E. W. ORMOND,

Offg. Asst. Secy. to the Govt. of Bengal,
Legislative Department.

The 23rd April, 1892.

THE following Bill was introduced and read in the Council of the Lieutenant-Governor of Bengal for the purpose of making Laws and Regulations, and referred to a Select Committee on the 23rd April, 1892, and is hereby published for information together with a Statement of its Objects and Reasons :—

STATEMENT OF OBJECTS AND REASONS.

THE Bengal Chamber of Commerce having on more than one occasion brought to the notice of Government the hardship arising from the arrangement under which nearly the whole cost of maintaining the Fire Brigade in Calcutta is assessed upon jute and cotton warehouses, and having urged that relief should be granted by transferring a portion of the burthen to the Municipal rates, a Committee, on which the Chamber of Commerce, the Port Commissioners and the Corporation of Calcutta were represented, was appointed to consider and report on the subject. The present Bill is based for the most part on the conclusions arrived at in the Report of the Committee. It proposes to effect an equitable apportionment of the cost of the Fire Brigade between the owners of hazardous buildings and the general body of tax-payers by laying down that sixty per cent. of the estimated annual expenditure shall be levied from the former and forty per cent. from the latter; this forty per cent. being again distributed between the Municipalities of Calcutta, Howrah, Cossipore-Chitpur, Manicktola and the South Suburbs in proportion to their assessable valuation. The Bill provides for fixing the rate of license fee for jute and cotton warehouses, and for including in the license such conditions as may be prescribed from time to time according to the nature of the business, and imposes the duty of inspecting such warehouses on the Police. It further provides that the Municipalities concerned shall grant the licenses and realise the fees. The control of the Fire Brigade is, as now, to be exercised by the Commissioner of Police.

H. L. HARRISON.

15. Any person who breaks any of the conditions under which a license is held in respect of any warehouse shall be liable, on conviction before a Magistrate, to a penalty not exceeding fifty rupees for any one such offence.

Penalty for omitting to give notice on change in occupation.

PART III.

Funds.

17. The Commissioners shall retain five per centum of the license fees received and levied under section 5 in respect of warehouses within their respective municipalities as the cost of collection of such fees, in payment of all expenses incurred by such Commissioners, respectively, in or about the granting of such licenses and the collecting of fees as aforesaid.

Five per cent. of license fees to cost of collection.

Any balance of such five per centum which may remain after payment of such expenses shall be credited to, and any excess expenditure shall be defrayed from, the municipal fund of the municipality concerned.

18. The remaining ninety-five per centum of such warehouse license fees and all penalties recovered under this Act shall be paid by the Commissioners to the Commissioner of Police for the Town of Calcutta, and shall be applied by him to the maintenance of the fire-brigade as hereinafter provided.

Ninety-five per cent. of license fees to cost of fire-brigade.

19. The Commissioner of Police shall prepare annually, in or before the month of February, a budget or estimate of the receipts and expenditure of the fire-brigade for the year commencing on the 1st April next ensuing; and shall include, as items of such expenditure, the expenses to be incurred under section 8 in or about the inspection and superintendence of warehouses, and the amount to be retained by the Commissioners under section 17, as the cost of collection of warehouse license fees and all other expenses of the fire-brigade.

Budget of fire-brigade to be prepared.

In such receipts shall be included any balance that may be standing to the credit of the fire-brigade and all sums which are applicable to the maintenance of the fire-brigade other than the ninety-five per cent. of the warehouse license fees directed to be paid by the Commissioners under the last preceding section, and the sum to be paid by the Commissioners under the following next section.

The difference between the sum of such receipts and the sum of the total expenditure as appearing in such budget shall be the amount required to meet the cost of the fire-brigade within the meaning of section 5 and section 20.

Such budget shall be laid before the Commissioners of the several municipalities at a meeting, and shall be forwarded by them respectively, to the Local Government with such remarks as they shall think fit to record; and it shall be in the discretion of the Local Government to pass, or to reject, or to modify, the estimates of all or any sums entered in the same.

20. A sum equal to forty per cent. of the amount required to meet the cost of the fire-brigade as appearing in such budget shall be paid to the Commissioner of Police for the maintenance of the fire-brigade by the Commissioners from the municipal fund of the several municipalities subject to this Act, in the following proportions, namely:—

Letter from the Postmaster-General, Bengal, No. 681, dated the 5th April 1892.

The Government has had under consideration the question of substituting ...ed annual payment for the variable charge on account of the district post

now devolving on zamindars under Act VIII (B.C.) of 1862, for the purpose of maintaining communications between police officers, police-stations, and District and Sub-divisional Magistrates. The proposal emanated from the British Indian Association in April 1890, and the Postmaster-General, Bengal, was asked to report on it.

2. Mr. Colvin, with his letter of the 14th May 1891, submitted in reply a note reviewing the whole zamindari dák system, and suggested among other things the fixing of the cess for a period of ten years, and the amalgamation of it for collection purposes with the land revenue. The Lieutenant-Governor was favourably inclined towards the first proposal; but as it was probable that the effect of it would be that, if any additional zamindari dák lines were required to be opened in any district, there would be no money available for the purpose, except that set free by the Imperial post taking over any existing lines, His Honour deemed it necessary that the matter should be carefully considered before the Government accepted existing facts for a term of years. The Postmaster-General was accordingly asked to report whether any such extensions (of zamindari dák lines) were urgently wanted; whether there were any definite advantages, or the contrary, in fixing the cess for a term of years; whether its present variability caused serious inconvenience; whether it was true that zamindars fail to pay the cess and come under the punitive clause of section 9 of the Act through not knowing what they have to pay when the rate is raised; what steps should be taken to make the rate known to the zamindars; whether any establishment of peons was maintained for the purpose of notifying the rate; and if so, whether the cost of the same could be saved by the fixation of the rate for a term of years.

3. Zamindars are now, by rule 3 of the Revenue Money-Order Rules (section XIV, chapter IV of the Board's Miscellaneous Rules, 1888), able to pay their land revenue, road and public works cesses, and zamindari dâk cess, in one revenue money-order form, distinguishing what is meant for the cess and costs and interest in each case; and, *primâ facie*, there seems to the Lieutenant-Governor to be no reason why they should not be required to do so; but before issuing orders to this effect, he has deemed it necessary to ascertain from the Divisional Commissioners and District Officers, through the Board of Revenue, whether the proposal is feasible, and if not, what would prevent its being carried out. His Honour considers that it is wasteful to have one tauzi-navis keeping a list of all estates, showing the land revenue due from each, the kists when due, and the payments for the same; and another clerk keeping a list of all estates paying above Rs. 50, showing the zamindari dák cess due, its kists, and its payments. In addition to the economy that could thus be effected, there would be some saving in the cost of the peons who are separately maintained for issuing notices of default and collecting these payments.

4. The Lieutenant-Governor has since ascertained that in the 24-Parganas (*a*) the zamindari dák cess stands at 8 annas per cent of the land revenue, and has been unchanged for three years; (*b*) that there are two kists, the 1st June and 1st December, but (*c*) that the bakijai is made out only once a year for the December kist—not for the June kist; (*d*) that a penalty is imposed theoretically only when a certificate issues—practically not at all; and (*e*) that the tauzi register is an unauthorized (though useful) form invented by a Deputy Collector. In the Howrah district the rate has been changed annually, having been 15 annas in 1889, Re. 1 in 1890, 12 annas in 1891, and Re. 1-1 in 1892. There is one kist due on 1st January, and if the cess is unpaid in that month, the penalty is added to the amount unpaid. Nothing more is done till the end of the calendar year, when an arrear list is sent to the Collector of Hooghly, and certificates are issued. In the Cuttack district the rate has varied annually, ranging between Re. 0-9-5·59 and Re. 1-0-9·38, the calculation being made to two decimals of pies. Last year the list of estates liable to the cess was revised and a considerable number struck off, having been reduced by batwara below Rs. 50 land revenue. These instances, His Honour considers, are sufficient to show how irregularly the working of the cess is carried on, and it seems to him that it would be well for Government to try to introduce uniformity in all these details.

5. The reply of the Postmaster-General, Bengal, to the Government letter of the 16th June 1891, in which he was asked to report on the question of keeping the rate of the zamindari dák cess unchanged from year to year, has been received and considered: the statement furnished by him shows that practically no changes in the zamindari dák lines or expenditure are anticipated in the next year, and His Honour is satisfied that the cess should be fixed for at least five years, beginning from January 1893. The Board of Revenue should determine at once, in consultation with all Collectors, what the rate should be. It should be in tolerably round figures, if possible, such as eight annas, twelve annas, one rupee, one rupee four annas, and so on: and in any case there should be no pies and no decimals. Estates which pay less than Rs. 50 as land revenue in consequence of batwara should not be exempted under section 8 of the Act from payment of the cess.

6. The kist should be a single one only, and its date should agree with the date of one of the land revenue kists, probably the largest one of the year. The Board, in reporting what the rate of the cess should be, should also recommend, in consultation with the Collectors, the kist with which the cess should be collected. The arrear list should be made up (in a prescribed form) as nearly as possible 30 days after the kist, and the penalty under section 9 of the Act should then be added.

7. Although Act VIII (B.C.) of 1862 places the zamindari dák cess under the Magistrate, the Lieutenant-Governor thinks it had better be dealt with, as far as the demand and collections are concerned, in the Collector's office. Under sections 3, 5, 7 and 8 of the Act, Government can appoint the Collector to be "such other officer" in the place of the Magistrate.

8. The question whether it is possible to keep the accounts of the cess in the same tauzi ledger as the land revenue and road cess is under consideration by Mr. W. C. Macpherson, who has been appointed to report on reforms of the tauzi procedure generally. If this is not found possible, a form of tauzi ledger for the dák cess must be devised and prescribed.

9. A statement of the demands and collections on account of the zamindari dák, and also a return showing the expenditure and balance, should be attached to the Board's Annual Report on the Land Revenue Administration in future, and the necessary paragraphs summing up the facts, should be included in the Report. The cess is not of sufficient importance to be treated in a separate report like the Road Cess. Appended is a statement extracted from the return submitted by the Postmaster-General, Bengal, showing the demands, collections, and arrears, and also the expenditure on account of the District Post. From this statement it appears that there are very large arrears outstanding in some districts, and steps should be taken to reduce the amounts. The Lieutenant-Governor desires that the figures may be verified by the Collectors and the Accountant-General, Bengal.

CALCUTTA, *the 26th April* 1892.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 23RD OF APRIL 1892.

AT the beginning of the week the pressure distribution over the province was distinctly abnormal; there was a defect of considerably more than a tenth of an inch in the western parts of South Bihár and Chota Nagpur, and a defect of from a twentieth to a tenth of an inch over the central and western parts of the province generally, while at the eastern stations and in Burma pressure was practically normal. Baric gradients were therefore unusually steep over the province, and hence favoured the strong south-easterly and easterly winds which prevailed at all stations. These winds brought up much moisture, and hence humidity was very high, though temperature was generally a little below the normal. A few local storms were reported in South-West Bengal on the evening of the 17th instant, but in East and North Bengal they were rather numerous. These conditions continued practically unaltered on the 18th, and again on the evening of this day local storms with rain were numerous, almost every station in East and North Bengal receiving rain, while a few storms were reported in North Bihár and in parts of South-West Bengal. On the 19th the area of defective pressure extended, and in parts of Bihár and South-West Bengal pressure became from an eighth to a tenth of an inch below the normal. On the 20th the fall of pressure continued across the centre of the province, and on the 21st it became largest at the eastern and northern stations, while the fall was comparatively small in Bihár and South-West Bengal, and there was a general defect in the pressure over the province ranging from about a tenth of an inch in the south-eastern districts to nearly a sixth of an inch at some of the central and western stations, and thus practically a barometric depression existed over the province on this day. On the 22nd the depression became rather more marked, and pressure was about a quarter of an inch below the normal in Bihár and North Bengal, and the centre of greatest defect had been removed to North Bengal. Winds therefore became more westerly than they had been, and over the western half of the province winds were westerly, south-westerly and southerly, thus partially driving back the moist easterly and south-easterly current which had been previously prevailing. Owing, however, to the great differences of pressure, the wind force for the whole of this time continued very high. Up to this date, therefore, many local storms with rain continued to occur in the east and north of the province, but on the 22nd they became less numerous. On the 23rd a rather rapid increase of pressure took place, and the defect in Bengal was partially filled up, but still conditions were abnormal, and on this day strong southerly winds were blowing at almost all stations, and except at a few stations in North Bengal, rainfall was practically absent from the whole province. The principal features in the meteorology of the week have, therefore, been the abnormally low pressure, particularly in the west and north of the province, the exceedingly strong winds which have accompanied this distribution of pressure, and the numerous local storms with rain which have occurred in the east and north of the province, and on the last two days of the week the high temperatures which have been registered.

Pressure—As stated previously, has been in defect of the normal throughout the week; the mean defect has ranged from about 0·08″ at Gopalpore and False Point to about 0·13″ to 0·15″ at the western stations in South Bihár, while the general defect over the province has equalled about a tenth of an inch.

Temperature—Has been above the normal at the western stations almost throughout the week, but elsewhere it was generally in defect till the close of the week, when it became above the normal in all districts. The mean temperature for the week for the whole province is almost absolutely normal, but the western divisions, such as Chota Nagpur and Orissa, show excess temperatures of 2° and 3°; while North Bengal, on the other hand, shows a defect of nearly 4°.

The distribution of temperature over the province and its variation from the normal are clearly seen in the following table, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. It will be seen the day temperatures have been generally in defect, while the night or minimum temperatures have been rather largely in excess of the normal:—

Rainfall.—The heaviest falls during the week have occurred in East Bengal, which has received 2·70 inches, or about two inches more than usual for the period. North Bengal has received an average fall of 1·53 inches, or nearly half an inch in excess. The only other district receiving rather heavy rain has been South-West Bengal with an average amount of 0·70 inch, or practically a normal fall for the period. North Bihár has received 0·20 inch, and South Bihár, Chota Nagpur, and Orissa falls averaging only a few thousandths of an inch, and in these cases the falls are less than the normal amounts.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 23rd of April 1892:—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermographs, from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly in the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

The inhabitants of England, a small island in the ocean, are now the rulers of the greater part of the world. What they teach is received as truth. But their notions in the matter of geography and astronomy are not correct, and so the writer attempts to prove that Pauranik notions in these matters are worthy of greater attention.	1733
